Document Revision 1.75

Select COM Components / nanoStream RTMPActiveX Class

Drag the „nanoStream" Object Icon from the Toolbox onto your Form,
and drag a Button onto your Form
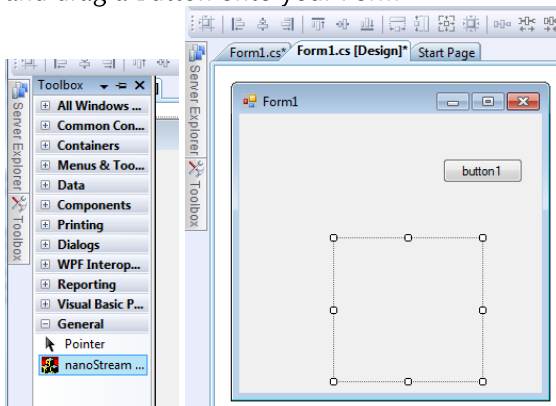

Double Click the "Button" to add source code:

```
private void button1_Click(object sender, EventArgs e)
{
    axRTMPActiveX1.InitEncoder();
    axRTMPActiveX1.StartPreview();
}
```

Run the application and press the button.
You should see a video image from your default camera.
