Document Revision 1.06

Pull an area with the mouse to the form:

Should look like this then:

Then add a standard button to test nanoStream:

Double Click the button and add this code:

```
procedure TForm1.Button1Click(Sender: TObject);
begin
  RTMPActiveX1.InitEncoder;
  RTMPActiveX1.StartPreview;
end;
```

Run the project.

Click on the button.

You should see nanoStream running in camera preview mode then.

Add Streaming / Broadcasting to a Media Server

```
  RTMPActiveX1.DestinationURL := 'rtmp://3p0.de/live+delphi123';
  RTMPActiveX1.VideoBitrate := 200000;
  RTMPActiveX1.StartBroadcast;
```
