## **Introduction**

The nanocosmos MP4/QT Multiplexer Filter enables you to create MP4, 3GP and MOV files from several audio/video input streams. This offers a wide range of applications from Mobile Phones (3GP), Portable Devices, (iPod, iPhone, Sony PSP etc.) up to Professional HDTV and broadcast formats.

## **Module / Version**

Module name: nmp4mux.ax

Version: 2.0.0.3

The module nmp4mux.ax contains two DirectShow filters:

1. nanocosmos MP4 Multiplexer Filter
2. nanocosmos QuickTime Writer (MPEG-2 / Broadcast)

## **DirectShow Connectivity**

The video input is accepting connections to filters matching the following media types:

Major types:

MEDIATYPE\_Video

Subtypes:

MEDIASUBTYPE\_MPEG2\_VIDEO,  
MEDIASUBTYPE\_H263,  
MEDIASUBTYPE\_H264,  
MEDIASUBTYPE\_AVC1,  
MEDIASUBTYPE\_MP4V,  
MEDIASUBTYPE\_MP4S,  
MEDIASUBTYPE\_MP41,  
MEDIASUBTYPE\_MP42,  
MEDIASUBTYPE\_DIVX,  
MEDIASUBTYPE\_XVID,  
MEDIASUBTYPE\_DX50,  
MEDIASUBTYPE\_MJPG

Formats:

FORMAT\_VideoInfo,  
FORMAT\_VideoInfo2  
FORMAT\_MPEG2Video

MPEG-2 Broadcast Filter supports only MEDIASUBTYPE\_MPEG2\_VIDEO and PCM Audio!

The audio input is accepting connections to filters matching the following media types:

Major types:

MEDIATYPE\_Audio

Subtypes:

MEDIASUBTYPE\_PCM,  
MEDIASUBTYPE\_IEEE\_FLOAT,  
MEDIASUBTYPE\_MPEG1AudioPayload,  
MEDIASUBTYPE\_MPEG1Audio,  
MEDIASUBTYPE\_MP3,  
MEDIASUBTYPE\_AAC,  
MEDIASUBTYPE\_AMR,  
MEDIASUBTYPE\_SAMR

Formats:

FORMAT\_WaveFormatEx

## Configuration

The multiplex configuration may be set by using the COM Interface IMP4Mux as declared in header file IMP4Mux.h or through filter property page.

```
// MP4 Multiplexer Filter GUID
// {78D670BF-49B5-4a3b-BB8C-E2A36E688FCF}
DEFINE_GUID(CLSID_NanoMP4Muxer,
0x78d670bf, 0x49b5, 0xa3b, 0xbb, 0x8c, 0xe2, 0xa3, 0x6e, 0x68, 0x8f, 0xcf);

// QT Writer MPEG-2 Broadcast Filter GUID
// {C2FB362B-CE6C-4797-BC16-F81976DFEF61}
DEFINE_GUID(CLSID_NanoQTWriter,
0xc2fb362b, 0xce6c, 0x4797, 0xbc, 0x16, 0xf8, 0x19, 0x76, 0xdf, 0xef, 0x61);

// Property Page for both filters
// {67F58B29-A153-46d2-9ACC-8C9F103AEF5F}
DEFINE_GUID(CLSID_MP4MuxerPropPage,
0x67f58b29, 0xa153, 0x46d2, 0x9a, 0xcc, 0x8c, 0x9f, 0x10, 0x3a, 0xef, 0x5f);

// Configuration Interface GUID
// {701D3A21-5041-45ad-ACBC-E025C294A690}
DEFINE_GUID(IID_IMP4Mux,
0x701d3a21, 0x5041, 0x45ad, 0xac, 0xbc, 0xe0, 0x25, 0xc2, 0x94, 0xa6, 0x90);
// Configuration interface ICodecProp
// {0F817204-82C8-4c12-884A-F45FB2F33A6E}
DEFINE_GUID(IID_ICodecProp,
0xf817204, 0x82c8, 0x4c12, 0x88, 0x4a, 0xf4, 0x5f, 0xb2, 0xf3, 0x3a, 0x6e);
```

```

// ICodecProp: IID_nanoPeg_LicenseString
// type: BSTR / Unicode string
// Set license string to unlock filter
// {1788F0B0-5985-4a19-B7FE-8AAC1BFC14B3}
DEFINE_GUID(IID_nanoPeg_LicenseString,
0x1788f0b0, 0x5985, 0x4a19, 0xb7, 0xfe, 0x8a, 0xac, 0x1b, 0xfc, 0x14, 0xb3);

```

## Setting the license to unlock filter

The filter can be unlocked either through a license key entry in the windows registry or by setting the license key through COM interface ICodecProp::SetProperty with the property `IID_nanoPeg_LicenseString` as first parameter. The second license parameter has to be a wide/unicode string!

## Configuration through IMP4Mux interface

```

IMP4Mux : public IUnknown
{
    STDMETHOD(SetMuxType(MP4MuxType muxType))=0;
    STDMETHOD(SetInterleaving(MP4MuxInterleaving muxInterleaving))=0;
    STDMETHOD(GetMuxType(MP4MuxType* muxType))=0;
    STDMETHOD(GetInterleaving(MP4MuxInterleaving* muxInterleaving))=0;

    // get/set timecode track options
    // timecode value in frames
    STDMETHOD(GetFirstTimecode(int32_t* timecode))=0;
    STDMETHOD(ReadWriteTimecodeTrack(bool* write))=0;
    STDMETHOD(SetFirstTimecode(int32_t timecode))=0;
    STDMETHOD(SetWriteTimecodeTrack(bool write))=0;
};

```

1. Set the desired multiplex format by calling 'SetMuxType' function

MP4 Multiplexer supports:

- Automatic selection from file extension (mp4,3gp,3gpp,mov), default
- MOV/QuickTime
- 3GP/3GPP
- Standard MP4
- MP4 for Apple iPod/iPhone
- MP4 for Sony Playstation Portable

MPEG-2 Broadcast Filter supports:

- MOV MPEG-2 Broadcast Generic
- MOV MPEG-2 Broadcast XDCAM 1080 50i
- MOV MPEG-2 Broadcast IMX 50 PAL

Additional multiplex format flags:

- Write output to multiple small file chunks (segmented file mode)  
This mode is automatically activated if the destination filename contains the index pattern “%i” and/or the timestamp pattern “%t”
- Write Moov index in advance ( MPEG-2 only)

2. Set the desired interleaving format:

- No interleaving
- Interleaving of audio and video streams, default

3. Get current multiplex format setting

4. Get current interleaving format setting

## Additional settings configurable through ICodecAPI interface

```
// Length of one file chunk in segmented mode in ms
// VARIANT_TYPE: VT_I8, VARIANT::l1Val
// default: 60000 (60 seconds)
// {66D77CD7-0D5D-49ff-B77B-95FB794A1F0A}
DEFINE_GUID(PROPID_nanoMP4MuxerSegmentDuration,
0x66d77cd7, 0xd5d, 0x49ff, 0xb7, 0x7b, 0x95, 0xfb, 0x79, 0x4a, 0x1f, 0xa);

// Behaviour if destination filename already exists
// VARIANT_TYPE: VT_I4, VARIANT::intVal
// Values:
// 0 - rewrite always (default)
// 1 - rename existing in segmented mode
// 2 - rename existing always
// {76514095-E93F-47fe-8394-67A4E9BA2EE1}
DEFINE_GUID(PROPID_nanoMP4MuxerFilenameMode,
0x76514095, 0xe93f, 0x47fe, 0x83, 0x94, 0x67, 0xa4, 0xe9, 0xba, 0x2e, 0xe1);

// Place MOOV index at the beginning of the file, streaming fast start
// VARIANT_TYPE: VT_BOOL, VARIANT::boolVal
// Values: VARIANT_TRUE - enable, VARIANT_FALSE - disable (default)
// {CD38E1A5-EE4A-4522-BECC-E592A6EB7A19}
DEFINE_GUID(PROPID_nanoMP4MuxerFastStart,
0xcd38e1a5, 0xee4a, 0x4522, 0xbe, 0xcc, 0xe5, 0x92, 0xa6, 0xeb, 0x7a, 0x19);
```

## **Debug-Log Configuration Registry Settings**

Key: HKEY\_CURRENT\_USER\Software\DebugNano\nmp4mux.ax

### **File name**

Sets the output file name. The folder must already exist.

Value name: LogToFile

Value type: REG\_SZ / String

Valid values: a valid output file name to enable file logging or an empty string

### **Logging level**

A higher value increases the amount of logging messages sent, and messages get more detailed.

Value name: TRACE

Value type: REG\_DWORD

Valid values:

0 – minimal logging

...

9 – maximal logging

## **Embedding / Customizing nanocosmos technology**

Nanocosmos also offers special OEM and customization service. Dependent on your needs, we may offer different models of licensing or application development.

## **About nanocosmos**

nanocosmos informationstechnologien gmbh is a software company providing professional video coding and streaming products. We are partners for digital TV and video/audio streaming for intra- and internet applications. Nanocosmos provides encoding and decoding solutions for any video standard on any platform, with specific expertise in plugin architectures and DirectShow filters. Based on core technology, additional support and development service is available for custom applications.

Contact us at <http://www.nanocosmos.net> or [info@nanocosmos.de](mailto:info@nanocosmos.de) for further information.

nanocosmos is a registered trademark of nanocosmos informationstechnologien gmbh, berlin, germany.
