info@nanocosmos.de

General Information

This document describes the nanoStream 2.0 "RTMP Authentication" interface.

Requirements:

- Wowza Media Server 2.0 or higher
- Wowza Plugin Module "Media Security"
- Download Link: <http://www.wowzamedia.com/forums/content.php?115>

Installation:

- Follow the download and unpack instructions from the download link
- Edit the file Application.xml at [install-dir]/conf/[application]/
- Add this <Module> at the end of the <Modules> list:

```
<Module>
  <Name>ModuleRTMPAuthenticate</Name>
  <Description>ModuleRTMPAuthenticate</Description>
  <Class>com.wowza.wms.plugin. security.ModuleRTMPAuthenticate </Class>
</Module>
```

Usage:

- Pass the user name and password to the nanoStream API with `nanostream.SetConfig("Auth","user:password");`
- Start Streaming with "StartBroadcast()"

Sample Web Application:

See the HTML web page in the folder `web/liveEncoder/nanoStream.html`

The feature is implemented there under "Options".
